ABOUT US

R&D

Our qualified team of designers and engineers turns ideas and projects to 3D designs and prototypes

DESIGN

Following latest trend in innovation, we launch new and exclusive products, most of them, adapted to customer requirements

MANUFACTURING

At our premises, we do produce for different markets with a strict Quality control that enables us to have ISO 9001 and ISO 14001 certifications so as the homologations for all our products

INJECTION

This division enables us to produce our plastic components and have a better control over the whole process

QUALITY CONTROL

Innovation, safety and personalization would not be possible without an accurate quality control both in laboratory and during the entire production process

CUSTOMER SERVICE

From the first steps of design, through production, quality control to After Sales, we do support our customers offering technical assistance

INTERVIEW

“On the right track”

Raül Colom

GENERAL MANAGER

Q. INDUSTRIAL ARCOL reaches 75 years. How was the beginning?

A. Our path began in 1942, in my grandfather's workshop in Barcelona, producing from Rear-View mirrors for motorcycles and cars, lighting fixtures, horns... to the mirror of the legendary Biscúter. My father continued this work and so we grew. In the 70's we were already exporting and in the 90's we moved to Sant Adrià del Besós.

Q. What have been the most outlined changes throughout your career?

A. As in the majority of companies in our country, the most significant change has been the integration of new technologies. This has allowed us to improve our processes and our quality system, while we have added new products... that is, we have grown. In fact, in 2008 we moved to new and much larger facilities in La Roca del Vallès

Q. Which are your main business divisions? To what industries are you focused?

A. The main activity are the Rear-View, lights and sunblinds. In the last years and with the integration of new technologies into our products, we have

incorporated driving assistance systems such as cameras and monitors. Our range of products could be found in Buses, Coaches, Motorhomes, Trains, Trams, Special Vehicles...

These 75 years would not have been possible without our partners and customers

Q. To what factors can be attributed your success?

A. To achieve 75 years as a successfully family business is the result of the effort and dedication of our team, partners and suppliers but above all, thanks to our customers. This would not have been possible without all of them.

“I think the best is yet to come”

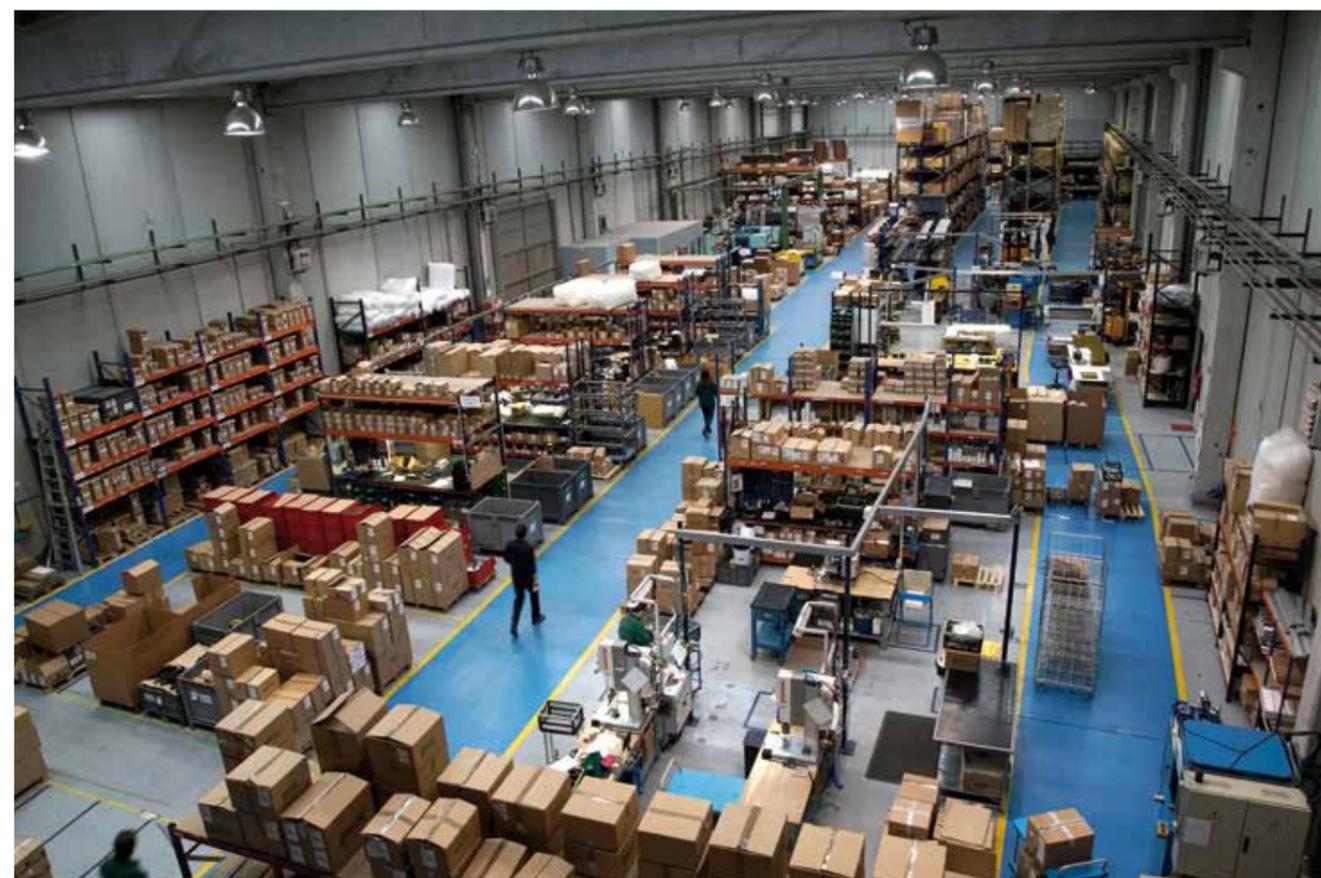

Q. What does it make you different from other companies in the industry?

A. The differential factor of Arcol is our aim of service towards customers. All our equipment, R & D, Quality, Production... is totally involved in working to offer the most innovative, technological and safe solutions for our client, As well as customize our products according to customer request.

Q. How do you see the future of Arcol?

A. We will work following our philosophy of innovation, improvement for the driving safety and definitely offering to our customers this global service from their first idea to the final product.

Although I think the best is yet to come.

1942

In this decade the manufacture of lamps and mirrors for motorcycles DKW and Citroën cars began

1950

1960

The international expansion starts with the first exports and the assistance to national fairs

1970

1980

This is the decade of growth: new headquarters, assistance in trade fairs (FIAA Madrid) and obtaining the ISO 9001 Certification of Quality.

1990

2001

Start-up of the company with the production of accessories for vehicles such as the rearview mirror for the BISCUTER

1942

We design and manufacture products still useful in the present market

1960

We widen our range of products with the sunblinds. In 1987 we exhibited for the first time at the fair of the Barcelona Motor Show

1980

The 300 Series is launched to the market. These are the first mirrors integrated in the bodyworks and with a design much more innovative as already done. We are exhibiting for the first time at international fairs (Busworld in Kortrijk, Belgium).

2001

HISTORY

ARCOL 75TH

2003

We keep growing and we moved to our new premises at La Roca del Vallès. Arcol is now present in over 40 countries

2008

2010

Cameras and monitors are included as system for the driving assistance, with the compromise for the safety on the road

2012

2015

We develop exclusive products as per customer needs and strengthen the Taylor Made area

2016

TODAY

Evolution, innovation with the aim of improvement: we launched lighting and signaling lights with LED technology

2003

We do introduce the first mirror with integrated cameras and get the ISO 14001 Certification in Environment

2010

Latest innovation in design, technology and aerodynamics in mirrors for buses and coaches: the new Born series

2015

... After 75 years we are still on the way

today

INDUSTRIES

COACH

Our wide experience in this industry allow us to cover all needs for each client. Aerodynamic products as a result of exclusive designs

CITY BUS

Under the premises of safety and design together with the latest technology to get the best visibility in the cities

MINI BUS

Innovation, security, design... adapted to smaller buses to achieve the maximum functionality within the cities

MOTORHOME

Concept of travel, enjoying the journey... that is adventure but without forgetting safety and design, comfort and functionality and of course the newest technology

SPECIAL PURPOSE VEHICLES

This market is also our target: strong and resistant products along with the latest technology also suitable for these vehicles: cameras, GPS and surveillance systems

TRAIN / TRAM

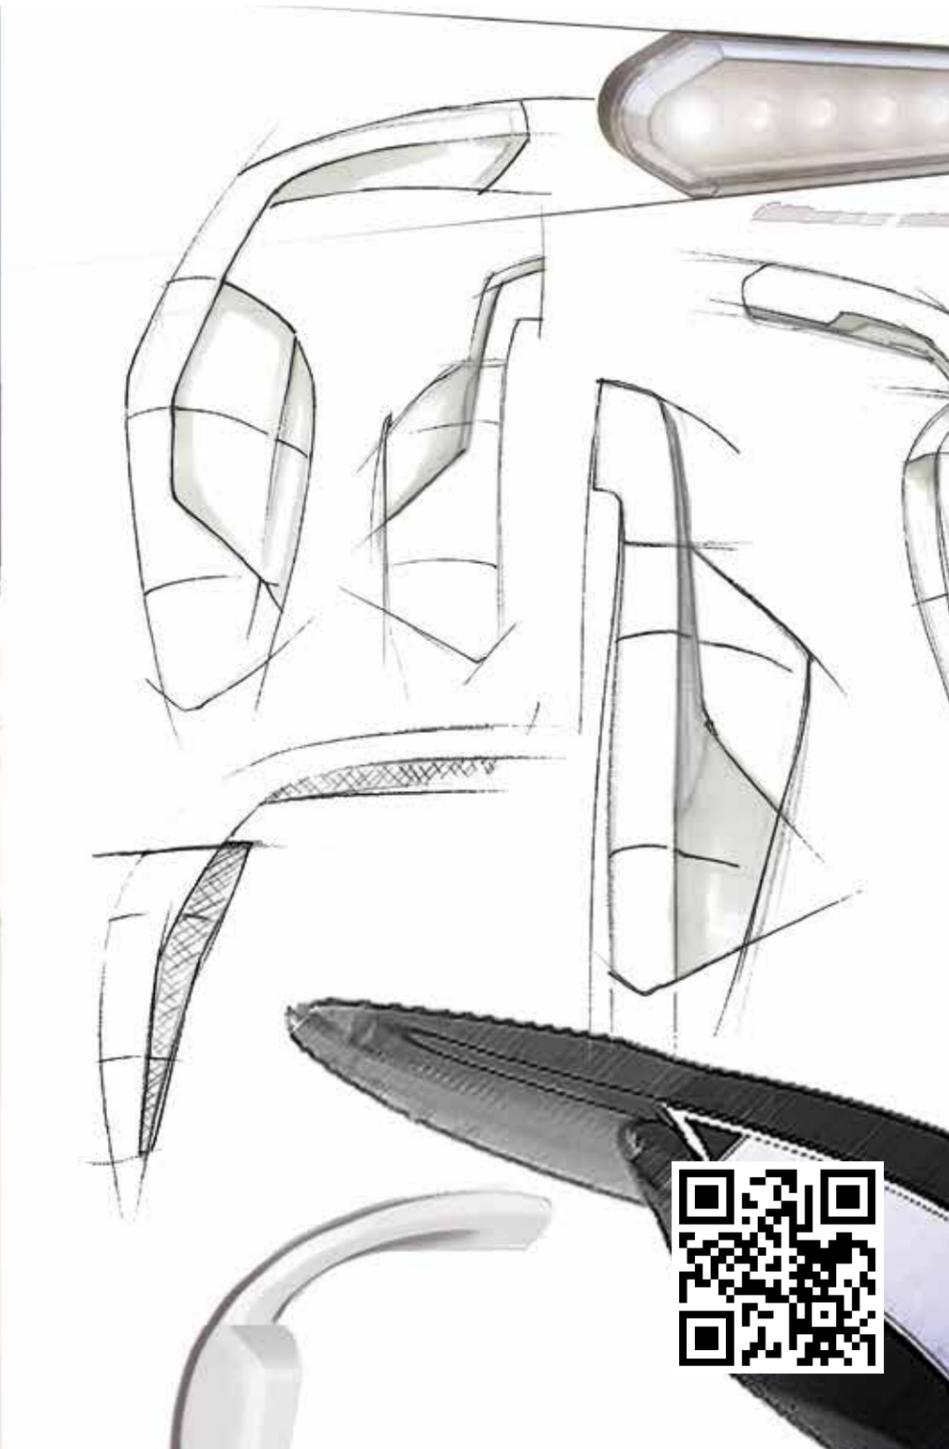

Special developments also suitable for the railway and tram industry. We do highlight the electrically folding systems, which become essential when arriving at the rail station

TAILOR MADE PRODUCTS

Our products **are adapted** to the needs of the client

From the initial concept till the final product, our design department is focused in **figure out the specific requirement of our customer.**

LED LAMPS

461 (Interior Led)

LAMP MOD. 461i

- » Touch Sensor switch
- » Auto Power Off (5min.) available
- » Vibration proof
- » Waterproof IP67
- » Voltage 10V to 30V
- » Operating temperature range :-30°C and 90°C

Lamp Mod. 461i / Ref. 1031000 (12V/24V)

LAMP MOD. 461

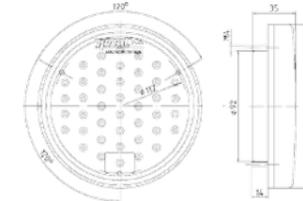

- » Vibration proof
- » Waterproof IP67
- » Voltage 12V or 24V
- » Operating temperature range :-30°C and 90°C

Lamp Mod. 461 / Ref. 1031001 (12V)

Lamp Mod. 461 / Ref. 1031002 (24V)

NEW

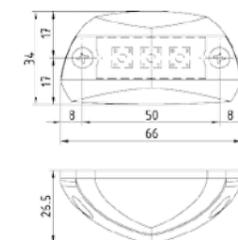

322

AVAILABLE IN 12V. OR 24V.

MODEL	FUNCTION
322-A2	Rear turn
322-PS	Tail-stop
322-BTF	Reversing

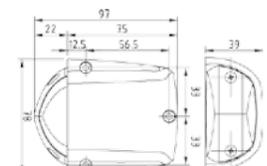

407 (Clearance Lamp)

AVAILABLE IN 12V. OR 24V.

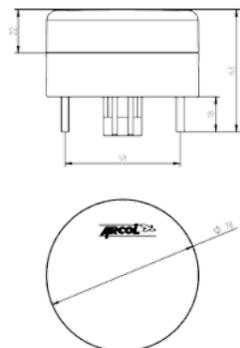

MODEL	FUNCTION
407-B	Front
407-R	Rear

Cover 407

MODEL	FUNCTION
407	Housing for surface fitting

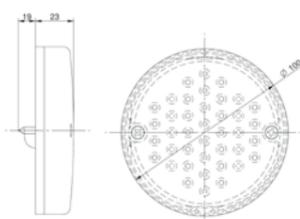

414

AVAILABLE IN 12V. OR 24V.

MODEL	FUNCTION
414-A1	Front turn
414-A1DF	Front turn error detection
414-A2	Rear turn
414-A2DF	Rear turn error detection
414-A2P	Rear turn and tail
414-AT	Rear fog
414-BT	Reversing
414-PS	Tail-stop
414-R	Posterior rear tail
414-DRL	Day light

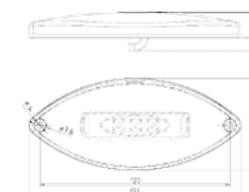

405

AVAILABLE IN 12V. OR 24V.

MODEL	FUNCTION
405-A2F	Rear turn
405-BTF	Reversing
405-PF	Tail
405-PSF	Tail-stop
405-PA2F	Tail rear turn
405-ATF	Rear fog
405-A1SAE	Front turn

311 (Reflex Reflector)

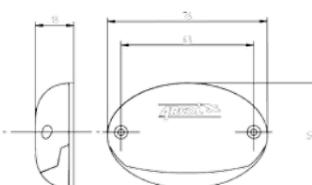

AVAILABLE IN 12V. OR 24V.

MODEL	FUNCTION
311-CT	Side marker-reflex reflector

INS: INTERIOR SCREW

499 (Internal Lights)

AVAILABLE IN 12V. OR 24V.

MODEL	FUNCTION
499-B	White
499-R	Red
499-AZ	Blue

LED SCHOOL SIGNALS
PROTECTION AND SAFETY
NEW IMPROVEMENTS

SCHOOL TRANSPORT SIGNALS

Child safety
is important to us all

Our **priority is to ensure the safety for the children** and so we have improved our reflectant School Transport Signals and with LED technology. We have them ready in different sizes and available to meet the regulation's requirement for most of the markets.

LED

SCHOOL SIGNALS

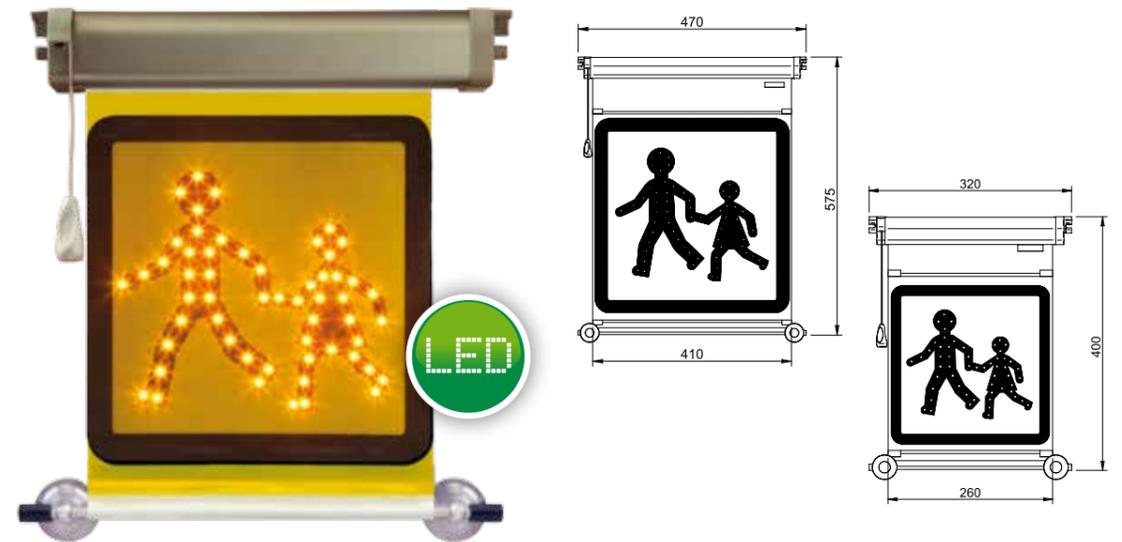

Spanish and french regulation valid in most of the countries

Spanish regulation

ACCORDING TO APPROVAL R-118 AND EN45545

French regulation

ACCORDING TO APPROVAL R-118 AND EN45545

Slip Ring
Innovative system of floating rings that allow the curtain to operate without the cables becoming twisted.

Automatic Power off Sensor

Features:

- » Improved safety system against short-cut
- » Minimize Led temperature
- » Energy saving
- » Extend School signal lifetime

NEW

Optional

Flash Function and Error Detection Device

» Reference **52 33 005**
FLASH.DEVICE SCHOOL LED 12/24V

Features:

- » For both 12V and 24V
- » 3 different protection systems:
 - » Against overvoltage
 - » Short-circuit
 - » Inverted polarity protection
